01 PROFILE

2024 Computer Science graduate and independent builder focused on applied machine learning, agentic AI, and full-stack AI products. Built working projects across pharmacy operations, multi-agent systems, IoT monitoring, automation, and computer vision. Strong foundation in Python, SQL, TensorFlow, LLM APIs, and modern web development.

02 CORE SKILLS

AI / ML	Python, TensorFlow, PyTorch, scikit-learn, pandas, computer vision, forecasting
LLM Systems	Agent orchestration, RAG, vector search, LLM APIs, OCR workflows, MCP
Product Engineering	React, TypeScript, FastAPI, PostgreSQL, Supabase RLS, Firebase, SQL, Vercel

03 SELECTED PROJECTS

Meridian - Multi-Branch Pharmacy SaaS

Independent build / React, PostgreSQL, Supabase, RLS

- Designed a multi-tenant pharmacy operations platform covering POS, inventory, purchasing, analytics, and role-based branch workflows.
- Implemented a seven-tier permission model with Postgres Row-Level Security and migrated the architecture from Firebase to a relational data model.

LegalMind AI - Multi-Agent Legal System

Architecture and prototype research / Python, vector search, LLM orchestration

- Designed an 11-agent architecture with hybrid retrieval for document-heavy legal workflows across MENA, US, UK, and EU contexts.
- Evaluated embedding, OCR, and generative-model strategies and produced a complete build specification and test pack.

FitAI - Adaptive Fitness and Nutrition

Mobile-first AI product / React, TypeScript, Node, Firebase

- Built personalized workout and meal planning from survey data, uploaded body-composition PDFs, and live weather context.
- Designed quarterly adaptation, calendar tracking, monthly AI adjustments, and safety interrupts for injuries or goal changes.

04 ADDITIONAL PRODUCT WORK

IoT Fleet Monitoring Platform

- Field sensors and GPS operations / Realtime data, role-based dashboards, mapping
- Designed a multi-tenant monitoring platform for smart drains and bins with live GPS mapping and four operational user roles.
 - Built reporting workflows and prepared the system for load testing and customer onboarding.

AI-Powered Google Workspace Assistant

- Email and form automation / n8n, Gmail API, Google Forms
- Automated email intent classification, response drafting, and Forms-to-stakeholder notifications without manual routing.

05 APPLIED ML HIGHLIGHTS

Computer Vision	TensorFlow mask-detection CNN, approximately 91% accuracy.
Classification	Earthquake damage and bankruptcy prediction with bias and class-imbalance analysis.
Forecasting	GARCH volatility and ARMA air-quality models using API and time-series data.
Unsupervised Learning	K-means customer segmentation with PCA and an interactive Plotly dashboard.

06 EDUCATION AND CERTIFICATIONS

2020 - 2024	Bachelor of Computer Science Arab Academy for Science, Technology and Maritime Transport - GPA 3.1 (Very Good)
2023 - 2024	Diploma in Machine Learning and AI Amit Learning - Grade: Excellent (95%)
2024	AI Lab: Deep Learning for Computer Vision WorldQuant University - TensorFlow and PyTorch

07 LANGUAGES AND LINKS

- Arabic: Native English: Professional working proficiency
